

## Category Management

**Category Management** allows you to create your own groupings of SDM’s standard sub-minor categories. Once you have created a custom grouping, the new custom category will then be available to run those reports using the **AD-HOC REPORTING** option under the “**Reports**” tab.

**Category Management** does not change the defined SDM standard categories, it merely allows you to group the selected DPMSS segments for easier future data run.

For example, if you often run reports including all 3 sub-categories of Light-Cure Composites (04020000): Instead of having to select 04020100 (Kits), 04020200 (Capsules), and 04020300 (Syringes) each time; you could create a category grouping called ‘Light-Cure Composites’ and select the appropriate sub-categories. Once created, you can run reports based on your new grouping from AD-HOC REPORTING each time you wish to analyze these segments group.

*Please contact SDM directly (201-635-9020) if you have any questions about using Category Management.*
